

## Temporary Event Venues

*Ignore inclement weather.*

*Large doors for easy access*

*Natural, diffused light interior*

*Stand out, above the crowd!*

*Removable, screw-in anchors*

*Pop-up retail, Halloween store*

*Concrete blocks as anchorage*

**A climate controlled, rapidly deployable, reusable, environment for Special Events.**

## Temporary Event Venues

Edmonton, Alberta played host to the inaugural version of the Edmonton Indy in 2005. As part of this event, Airwise technology was selected to provide a temporary venue for a static indoor display of racing cars.

*All necessary structure components delivered on 1 flatbed.*

Speed and ease of installation and subsequent removal at the end of the event were primary concerns when considering potential facility solutions.

Installation of an Airwise Temporary Event Venue is a straightforward process, which can usually be completed in a single day or less, by a group of 6 to 8 average individuals with no special skills, and a minimum of heavy equipment.

*A crew of 6 to 8 average individuals is all that is required for setup.*

First the anchoring is located and installed, be it concrete blocks,

screw-in pilings or some other specified anchorage solution.

Next the door(s) and frames, fans and vents are set in positions as indicated on the engineering drawings.

The cover is then unfolded and spread out, and the integrated cables attached to their respective anchor points.

Finally, the power is hooked up, or the generator started, the controls and fans are turned on and the cover is rapidly inflated over the site.

*Screw-in piles were installed for anchorage in this case..*

Your climate controlled Airwise Structure will be filled with natural daylight. Visitors are free of wind, rain or snow, regardless of local weather conditions.

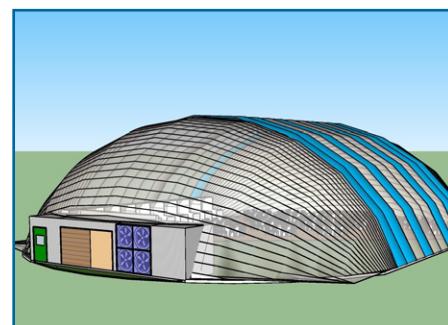

*Cables anchor to Screw-in pilings with a simple shackle.*

Airwise Structures, ideal for special events facilities.

## Airwise introduces... Buildings in Boxes™

Airwise Structures Inc. is proud to announce, an even better special event venue solution. Available in sizes from 10,000 to 30,000 sq. ft., our “Buildings in Boxes™” are designed as a plug and play solution, ready to deploy, in one 40 foot container.

All mechanical, electrical and control systems are factory installed into a modified 40 ft. shipping container, including space for transporting and storing the cover. The “Box” also includes a standard personnel airlock, plus overhead door for equipment or vehicle access into your venue.

*Everything you need, in a containerized, 40 foot package.*
