

## The Classic Airwise Structure

*The traditional Airwise Structure is a pressure stabilized structure system, individually configured and engineered to meet your specific requirements. Airwise Structures have no practical size limit and can be designed and manufactured to create covered and climate controlled areas from 20,000 sq. ft. to 2 million sq. ft. or more.*

### Features:

- Enclosed, climate controlled, clear space
- No practical size limit, from 20,000 sq. ft. to 2 million sq. ft. or more
- Mechanical and electrical systems custom configured to meet your unique needs
- Airwise representatives consult your general contractor and sub-trades to ensure a successful Airwise Structure deployment on your site.
- One-piece, double layer, insulated cover generally installed in less than a day
- Multiple foundation or anchorage options to choose from
- options engineered to meet your specific requirements

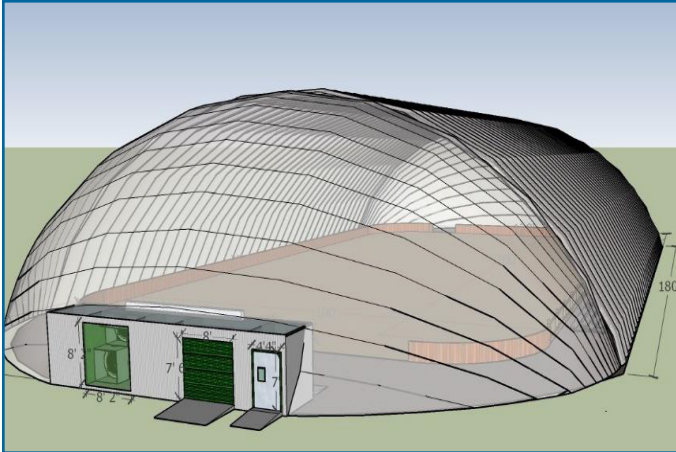

### Applications:

- Long term installations, semi-permanent, or larger sites
- Remediation sites
- Golf driving range, training facility
- Soccer/football stadiums, multi-sports complexes
- Baseball parks
- Alternate, affordable business parks
- Construction site covers
